

About Us

The Nevada Clean Energy Campaign opposes the final proposed coal fired power plant in Nevada and supports meeting Nevada's energy demand through energy efficiency and clean renewable energy.

We have a moral responsibility to be good stewards of the environment so our children and grandchildren can be left a legacy of a safe and healthy planet. It's time we stopped polluting our air and using more of our renewable natural resources like wind and solar power that don't harm the air we breathe. Together, we need to encourage faster development of renewables to protect our health and ecosystem. Please join the following member organizations that make up the Nevada Clean Energy Campaign.

- American Association of University Women
- American Institute of Architects - Nevada Chapter
- American Lung Association - Nevada
- Boulder City Green Team
- Bristlecone Alliance
- Business Advocating Social Equity
- Center for Energy Efficiency and Renewable Technologies
- Citizen Alert
- Defend Our Desert
- Dr. JoAnne Leovy, MD
- Environment America
- Environmental Defense
- Grand Canyon Trust
- Great Basin Resource Watch
- Green Dream Enterprises, LLC
- League of Women Voters
- National Organization for Women - Nevada Chapter
- National Parks Conservation Association
- National Wildlife Federation
- Natural Resources Defense Council
